目的：	The aim of this class is to help students enjoy watching travel documentaries in English. Documentaries offer a unique listening experience. They are quite different from TV dramas and movies. This class will enable students to enjoy watching a variety of British TV presenters on their travels around the world. Students will be able to improve their listening skills by naturally learning many useful vocabulary and idioms while exploring this amazing world we live in.
授業内容：	This two hour class will focus primarily on listening and vocabulary acquisition skills. In each class we will learn around 20-50 new vocabulary and idioms. Then we will watch a section of a documentary where the new vocabulary is used. Listening worksheets will also be used to help you develop your listening skills in an effective way. We will also devote 15-30 minutes per class talking about and discussing the documentary we are watching.
